

Digitized Automation for a Changing World

Delta Hybrid Injection Molding Solution CSJ Series

**High Energy Efficiency, Precise Control
and User-friendly Design**

Delta Hybrid Injection Molding Solution

As injection molding technology is changing day by day, Delta has launched the Hybrid Injection Molding Solution, which integrates the Hybrid Energy Saving System HES Series, the Synchronous Torque Motor MST Series, the Door Control Drive and Motor VFD-DD Series, and the Control Unit for Injection Molding Machine CSJ Series. This highly integrated system is compatible with dedicated production monitoring and management software DIAeBOX for real-time production data collection and management.

Delta's Total Solution

- Achieves real-time operation data sharing and timely adjustment of the host controller and servo system by CANopen
- Dedicated operation interface for parameter setting, monitoring, control and real-time alarms for anomalies of the Hybrid Energy Saving System and the Synchronous Torque Motor
- Highly integrated, supports various communication interfaces to meet the high connectivity demands of equipment

Control Unit for Injection Molding Machine CSJ

- Control Unit for Injection Molding Machine CSJ consists of a PLC (CDA-J), an HMI (DOP) and a keyboard
- 12" full-color display for operation via both keyboard and touchscreen
- Dedicated PLC programming for secondary development (IEC 31131-3 Standard) to keep critical technologies in-house
 - Includes function modules for injection molding machine
 - Customized control sequence can be achieved through programming
- Adopts Delta's superior drive technology, tuning capability, and monitoring interface to improve Overall Equipment Effectiveness (OEE)
 - Allows quick parameter setting of the Hybrid Energy Saving System without opening the electrical box
 - Actively switches the PID control according to the production process
 - Displays real-time operation status and component health diagnosis
 - Records system anomalies
- Supports CANopen and Modbus for connection to other equipment
- Compatible with dedicated production monitoring and management software DIAeBOX for centralized management and remote monitoring
 - Notification of maintenance and equipment lifetime prediction
 - Remote monitoring with communication software for timely debugging
 - Improves Overall Equipment Effectiveness (OEE)
- Supports VNC for remote monitoring and control
- Supports high-speed pulses for servo rotary tables
- Pluggable terminal blocks for wiring efficiency
- Integrated as an all-in-one injection molding machine solution with one-stop-shop service

Specifications

CSJ Model		CSJC6401DL 12K5901	CSJC8001DL 12K5901	
PLC	Model	CDA-J6401	CDA-J8001	
	PLC Software	ISPSOFT supports IEC61131-3		
	PLC Program Capacity	128K steps		
	Voltage Level	DC+24V		
	Digital	Input	32 (DC 24V)	40 (DC 24V)
		Output	32 (DC 24V·2A)	40 (DC 24V·2A)
	Analog	Input	4 (0~10V)	
		Output	4 (-10V~10V & 0~10V)	
	Relay Output	12 (including 7 channels for temperature control)		
	High-speed Pulse I/O	2+2		
	Channels	8-channel		
	Thermocouple	K, J, E type		
	Communication Interface	RS-485 × 1 Modbus RTU/ASCII; CANopen × 1		
HMI	Model	DOP-112WX		
	OS	Linux		
	Software	DOPSOFT		
	Voltage Level	DC+24V		
	Display Type	12.1" TFT LCD		
	Display Orientation	Landscape		
	Resolution	1,024 × 768		
	Touch Panel	Four-wire resistor		
	Communication Interface	USB × 1 ; Ethernet × 1, supports OPC-UA (in development)		
	Buzzer	Built-in		
	RTC	Built-in		
	Keyboard	Model	KBI-J5901	
		Function Keys	59 keys, on-screen keys available	
E-stop Switch		1		
Key Switch		1		
SD Card Extension		Max. 32G		

Dimensions

PLC (CDA-J Series)

Unit: mm [inch]

W	W1	H	H1	D	D1	S1	S2
415.0 [16.33]	401.0 [15.78]	115.0 [4.52]	80.0 [3.14]	50.6 [1.99]	48.8 [1.92]	4.5 [0.17]	8.0 [0.31]

*This is the CDA-J8001 model. CDA-J6401 model has no terminal blocks within the frame.

HMI (DOP-112WX)

Keyboard (KBI-J5901)

Unit: mm [inch]

W	H	D
317.4 [12.5]	246.4 [9.70]	52.7 [2.07]

Unit: mm [inch]

W	W1	H	H1	T	T1	T2
317.4 [12.5]	302.7 [11.9]	245.0 [9.65]	228.7 [9.01]	1.6~6.0 [0.06~0.24]	32.5 [1.3]	45.8 [1.8]

A: Front B: Back C: Side

1. HMI communication port 2. Terminals 3. Safety switch 4. USB port 5. Key switch

- 1. LAN 1 (1,000 M bps)
- 2. Controller terminal
- 3. HMI terminal
- 4. DC 24V
