# Introduction

Delta's ASDA-A2-E, an advanced AC Servo Drive with an EtherCAT communication interface, complies with IEC61158 and IEC61800-7 and follows in the footsteps of the successful ASDA-A2 series. This advanced A2-E supports all the modes of the CoE device profile based on CiA402 and all command types of EtherCAT. It also features a built-in Safe Torque Off (STO) function which prevents torque energy from continuing to act upon a motor and averts accidents. In addition, A2-E offers an extension digital input port for a wide range of machinery automation fields. This series covers a power range from 400W to 7.5kW for 400V and 100W to 3kW for 220V.

ASDA-A2-E Series is your ideal servo drive to achieve high speed multi-axis synchronization applications.

## Features

- Passes EtherCAT conformance test by EtherCAT Technology Group (ETG)
- Integrated Safe Torque Off (STO)\* safety function according to the following standards:
  - IEC EN 61508 (SIL 2)
  - IEC 62016 (SIL 2)
  - ISO 13849-1 (Cat.3 PL=d)
- Supports absolute type and incremental type of servo motors
- Supports touch probe function
  - Enabled with dedicated Digital Input (DI) on CN7 or the external encoder

\*Note: STO function is not available for 200V 4.5kW~7.5kW models
